

## **Precision Turbines and Reliable Jet Maintenance Announce Teaming Agreement**

### **Aircraft Maintenance and Engine Services Offering Extended to Military and Business Jet Owners and Operators of a Wide Variety of Engines and Aircraft**

#### **FOR IMMEDIATE RELEASE**

**Boca Raton, FL, May 12, 2009** – Precision Turbines, Inc., (“Precision Turbines”) proudly announces they have entered into a partnering agreement with Reliable Jet Maintenance, LLC (“Reliable Jet”). The partnership allows Precision Turbines to extend its unparalleled level of customer service, aircraft management and engine/aircraft repair services to owners and operators of multiple airframes including Cessna Citation, Gulfstream, Beechcraft, Learjet, Challenger, Dassault, and Hawker. Additionally, perform 91.207, 91.411, and 91.413 inspections as well as perform maintenance on Pratt & Whitney series, Rolls-Royce, Honeywell, and General Electric CJ series engines.

“We are enthused about extending our repair services and aircraft management capabilities to our business jet and government customers as we partner with Reliable Jet to broaden our scope and capabilities in both aircraft and engines. At the end of the day, we are all about providing our customers with choice and pride ourselves on presenting customers with solid options from which to choose,” stated J.D. de Haseth SVP Sales and Corporate Development, Precision Turbines.

Jonathan Burls, President, Reliable Jet said, “Being a young and dynamic company, as we are, with an impressive depth and breadth of capabilities, we welcome the opportunity to work closely with Precision Turbines and their customers to offer our services and team’s expertise. Our diverse experience has made us one of the fastest growing FAA 145 Certified Repair Stations in the southeast U.S. and this partnership will only continue to solidify our strong position in the market.”

“Precision Turbines continues its vision of partnering with the best in the industry, as exemplified by our agreement with Reliable Jet”, commented, Bob Spahr, Precision Turbines, President, and continues to state, “This enables our company to meet the increasing demand of our existing and new customers as we expand our service capabilities into other aircraft and engine series.”

Through this partnership, Precision Turbines seeks to continue to deliver an unparalleled level of customer service and program management to the military government and business jet market as they broaden their scope and capabilities.

#### **About Precision Turbines**

Precision Turbines, Inc., is a global aviation company providing a wide variety of products and service for the aviation industry, with specialization in the Pratt & Whitney Turbofan JT15D and Pratt & Whitney Turboprop PW100, PT6A and Rolls-Royce T56 engines. We offer half-life, overhauled and new engines as well as OEM and PMA parts. Through a variety of supplemental type certificates (STCs) we offer new Williams FJ44 and PT6A engines to support the expanding engine retrofit market.

As an authorized Sierra Industries Sales Representative, Precision Turbines provide the business jet market with highly efficient, high performance FJ44-2A, and 3A powered Stallion, Super II and Super

SII aircraft. Additionally, we offer upgrades to power PT6A aircraft with the PT6A-21, 42, 52, 61 and 135A engines resulting in increased range, speed, climb performance, efficiency and comfort.

Partnering with best-in-class industry providers, Precision Turbines offer complete aircraft management services and, currently under contract, serve and manage the Cessna Citation fleet for the U.S. Department of Commerce. We are U.S. government certified, Central Contractor Registered, CAGE Code 552E4 and offer cost-effective maintenance event for aircraft at our selected Pratt & Whitney DDOF, Rolls-Royce approved facility and FAR 145 facilities. Precision Turbines is headquartered in Boca Raton, Florida with partners and sales offices worldwide. For more information on Precision Turbines, please visit <http://www.precisionturbines.aero>.

### **About Reliable Jet**

Reliable Jet Maintenance, LLC is a dynamic company whose primary goal is to provide a seamless integration of a full maintenance division for a variety of aircraft, whether a one-time tire service or a fully managed maintenance program. We offer decades of experience to clients and strive to maintain a level of service unparalleled in South Florida. We have cultivated a safe environment in our facility that promotes Senior Technicians to continue the traditions of passing knowledge and skills onto the next generation of technicians; combining cutting edge technology with true craftsmanship that has been long lost.

Reliable Jet's diverse experience has made the company one of the fastest growing FAA 145 Certified Repair Stations in the southeast U.S.; we can provide virtually any aircraft inspection, a customized maintenance program, and even pre-purchase evaluations. Reliable Jet offers a dedicated team that offers mobile support to flight departments anywhere in the world. We have a fully stocked parts department to help ensure that we are able to present the best quality maintenance in a timely manner.
