

## Engine Exchange

Advantages of an engine exchange: an engine exchange reduces the time spent on the ground - no more waiting whilst your engine is serviced. A reconditioned engine will normally be available to you immediately. Precision Turbine exchange engines are fixed price so there will be no surprises when you get your bill.

Precision Turbines offers an impressive engine exchange program that allows you to trade in your engine for an engine fresh from MPI, CZI and Overhaul. Alternatively, we can arrange to sell your engines, aircraft, and parts on consignment.
