Precision Turbines, inc. specializes in the Pratt and Whitney JT15D, PT6A, TPE 331, TFE 731 and Williams FJ 44 engines from our headquarters in Boca Raton, FL. We are uniquely positioned to offer new, overhauled and half-life engines to owners of Cessna Citation and King Air turboprops through outright sale, exchange or lease options. We also maintain a large supply of serviceable parts for these engines. Our exchange program provides business jet owners and operators with a fixed cost thereby eliminating the unknown variables of cost and down time associated with complete overhauls.

Should you decide to overhaul your JT15D, PT6A, TPE 331, TFE 731 or T-56 engine, Precision Turbines can implement and manage a cost-effective and efficient maintenance event at our selected Pratt and Whitney DDOF, Honeywell, CFR part 145 facility, or Rolls Royce approved repair station. With over 85 years of combined industry experience, we are dedicated to providing outstanding service to our customers. Precision Turbines, Inc. offer specialized solutions to fit all of your needs.

DEALS ABOUND FOR USED BUSINESS JETS
Used business jets now stand at the lowest inventory levels in one-and-a-half years, but savvy buyers can still find deals on some models, writes columnist Bryan Comstock. For example, the Challenger 604 can be had for an asking price of about $13 million. "So while the market is moving, there are countless opportunities just waiting for buyers to pick off the tree,”..Read More

BIZJET ORDERS AT BOMBARDIER BOUNCING BACK
Montreal-based Bombardier Aerospace yesterday reported six net business jet orders in the first quarter versus a negative net order of -41 a year ago. While it received 22 gross orders and logged 16 cancellations in the first quarter, Bombardier Aerospace president and CEO Guy Hachey said business jet cancellations have slowed considerably from last year. Read More
CESSNA HALTS MUSTANG PRODUCTION LINE DUE TO SUPPLIERS
Cessna will halt production of its Cessna Mustang line due to issues with suppliers affected by floods in Rhode Island. Doug Oliver, director of corporate communications for Cessna, said the aviation company will issue rolling layoffs to about 200 workers. Cessna delivered 21 of the very light jets in the first quarter..Read More

SUPPLIERS, ORDERS GROW FOR CIRRUS VISION JET
Cirrus Aircraft's SF50 Vision single-engine jet program is "making good progress," according to president and CEO Brent Wouters, who spoke during a Web presentation yesterday for Vision position holders. Cirrus has spent $64 million so far on the program and will spend an equal amount to see the program through certification. The Duluth, Minn.-based company..Read More

VIRGIN BLUE EXPECTS WORD FOR U.S. ON DELTA PARTNERSHIP BY AUGUST
Virgin Blue Holdings says it expects to hear by the end of August whether U.S. airline authorities will approve its proposed joint venture with Delta Airlines to operate on the Trans-Pacific route between Australia and the U.S. Authorities in Australia have already approved the partnership..Read More

BIZAV FLIGHT ACTIVITY STILL CLIMBING
Business aircraft flight activity increased 4.8 percent in April compared with year-ago levels, according to TraqPak data released by aviation specialized services firm Argus. By aircraft type, midsize jets led with a 7.7-percent increase over the same month last year, followed by light jets (+7 percent) and turboprops (+4.4 percent). Large-cabin jet flying..Read More

THIRD G650 JOINS FLIGHT TEST PROGRAMME
The third Gulfstream G650 has joined the flight-test programme for the company's flagship model, accumulating 10 hours of flight..Read More

MORE DELAYS LOGGED IN HONDAJET PROGRAM
The HondaJet program has once again been delayed. Honda Aircraft began notifying buyers last month that delivery of the first HA-420 HondaJet is now planned for the third quarter of 2012. “Regrettably we've experienced delays in some components,” a HondaJet spokesman told AIN. He declined to identify the suppliers involved in the latest setback for the..Read More

APPEALS COURT SUPPORTS U.S. AIRWAYS PILOTS
A U.S. Appeals Court has ruled in favor of pilots for U.S. Airways and overturned a jury's earlier conclusion that the U.S. Airline Pilots Association breached its duty to represent six America West pilots who were plaintiffs in the case. The appeals court ruled that the matter is not ready to be adjudicated because it has so far not caused harm to the plaintiffs, and the case was remanded to the U.S. District Court in Phoenix..Read More
FALCON 2000DX/EX/LX TO LAND SHORTER
Dassault is about to receive certification for a "nose-up autobrake" feature to further cut Falcon 2000-series landing distances, chief test pilot Philippe Deleume told AIN last month. The technique will reduce landing distances by approximately 150 feet, thus helping the 2000DX/EX/LX meet London City Airport requirements. 

SENATOR SUGGESTS AIRLINES NEED MORE REGULATION TO RESTORE STABILITY
Sen. Herb Kohl, D-Wis., has raised questions about whether the airline industry in the U.S. should be regulated by the government similar to the way public utilities are regulated. Kohl brought up the idea at a recent hearing of the Senate Judiciary Committee Subcommittee on Antitrust, Competition Policy and Consumer Rights, where airline CEOs were seeking approval of their pending merger.

CONGRESS RECOGNIZES BIZAV FOR HAITI RELIEF
Both houses of Congress last month passed a bill recognizing the entire general aviation community, including business aviation, for Haiti relief efforts following the devastating January 12 earthquake that struck the island nation.

DELTA RISKS CULTURE, COMPETITIVENESS IN UNIONIZATION VOTE
In fighting off an aggressive unionization effort, Delta Air Lines is trying to preserve a familial corporate culture with deep southern roots. Delta is proud of its 60-plus years without a strike, compared with 11 strikes in 50 years at Northwest Airlines, which merged with Delta in 2008. Analysts say Delta, which is currently about 30% unionized, could lose a competitive advantage if flight attendants, machinists and other groups vote for union representation.

INDUSTRY EXHIBITS SIGNS OF RECOVERY AT EBACE 2010
Is the business aviation industry out of the bog, or is it still slogging through the mire toward higher economic ground? Judging by the European Business Aviation Convention & Exhibition (Ebace) last month (see report on page 28), a recovery is already on firmer terrain. How much of that interest will translate into money changing hands? Many at the.

CUSTOMER SAVVY JETBLUE TOPS BRAND RANKINGS
JetBlue is the American brand with the most "social currency" according to a report from Information Architects. Analysts say the company has succeeded by connecting with customers and building a strong reputation for value thanks to positive word-of-mouth reviews.

HONEYWELL: NEW BIZAV GROWTH IN OLD WORLD REGIONS
One trend identified in Honeywell’s latest Business Aviation Outlook is the increasing importance of international sales. The 2009 operator survey indicates that over the next five years up to 34 percent of all new jet purchases in the world could come from Europe, the Middle East and Africa. These findings reflect a significant increase over prior survey.
ROLLS-ROYCE ADVANCING ENGINE TECH WITH E3E CORE
Rolls-Royce today announced that it has successfully run the latest E3E (efficiency, environment, economy) core engine as part of its two-shaft research program, which is intended to develop future powerplants for business jets and single-aisle airliners. The latest core build produced “excellent results” during 40 hours of run trials at Stuttgart..Read More

COMMUTER FLIGHT LANDS ON HIGHWAY
Highway landings happen all the time but not usually with paying passengers, as happened in central Manitoba, Canada, on Friday. The pilot of a Gillam Air Services Britten Norman Islander set down on a straight stretch of highway near Thompson, about 500 miles north of Winnipeg, after an apparent engine failure. There were five pax on the nine-passenger twin..Read More

TRAFFIC REPORTS SHOW GAINS FOR U.S. AIRLINES
U.S. airlines across the board reported increases in traffic and revenue passenger miles in May. Alaska Airlines led the pack with a 10.7% jump over last year. Meanwhile, AirTran, U.S. Airways, American and Delta posted gains ranging from about 2% to 8.5%..Read More

INVESTIGATORS: POLISH CREW IGNORED WARNINGS
Newly released transcripts from the cockpit recorder of the Polish government aircraft that crashed in Russia in April show the crew ignored system warnings and offer no direct proof that the crew’s actions were influenced by political officials onboard (but may suggest that). According to reports, the 41-page transcript released Tuesday shows the crew was aware of the weather at Smolensk's Severny airport, which was worse than minimums, but proceeded with the approach even as system warnings began to sound in the cockpit..Read More

A FIRST FOR FEMALE AIR FORCE PILOT
The Air Force says Col. Dawn Dunlop was the first woman to fly an F-22 and becomes the “first female fighter test pilot to lead an Air Force wing” when, on June 4, she takes command of the 412th Test Wing at Edwards Air Force Base. Prior to 1993, the Air Force carried a ban on female fighter pilots. Dunlop graduated from the Air Force Academy in 1988 and went on to the Air Force Test Pilot School at Edwards in 1997..Read More

UNION DEALS SETBACK TO AA TALKS
The Transport Workers Union announced yesterday it will hold off on voting for a proposed labor agreement with American Airlines that was announced late last week. The union’s president said the agreement, which includes pay increases and some job cuts, failed to resolve key issues concerning roughly 10,600 ground employees..Read More

NASA SEEKS GREEN AIRLINER PROPOSALS
NASA is actively seeking proposals to be received by July 15 for studies that aim to realize (by 2025) commercial airliner concept designs for quieter, cleaner and more
The agency states that the total potential value of the research contracts is $36.6 million. Technological goals of the program include a 50-percent reduction in fuel consumption and nitrogen oxide emissions and an 80-percent reduction in the "nuisance noise footprint around airports" when compared with current airliners.
